

Digital Training for a Digital Age

Nothing can beat the premium experience offered by live, in-person, instructor-led training. But if you have challenges around scheduling, geography, or budget, then you need **Web Age University** -- *Digital Training for a Digital Age*.

Web Age University – *Live*

Subject Matter Experts from Web Age deliver engaging, digital education via the Internet. Students connect via a Web portal to view the presentation and use a conference call line to receive the audio.

- One-hour, two-hour, half-day, and full-day formats
- Connect in real time from anywhere in the world
- Submit questions by text or via the conference line
- Discuss solutions with the entire team in real time
- View live, instructor-led demos

Web Age University – *On Demand*

Recorded sessions are delivered by the same high-quality expert Web Age educators as our live sessions. The different here is that the sessions are recorded in advance and made available to your teams via your own Intranet or Web portal.

- Session lengths range from 5-60 minutes, depending upon the subject matter and the detail required
- Provide a library of topical knowledge to support on-going education
- Deliver consistent information across the organization
- Self-paced education

Available topics: Service Oriented Architecture (SOA), Enterprise Architecture (EA), Business Process Management (BPM), Web 2.0. XML, Web services, Java and Java frameworks, and more.
