

Practitioner Courses

- Practitioner Courses have extensive practical and hands-on items:
 - Artifact examples and templates
 - Hands-on labs, developing architecture artifacts
 - Group discussions on applying to student's environment
 - Industry references to provide in-depth resources
- Two levels:
 - 2 day for managers and stakeholders involved in EA activities, but not responsible for developing architecture artifacts
 - 3-4 day for architects developing artifacts (SA 3 days, EA 4 days)
- Two types:
 - Enterprise Architecture (EA)
 - Solution Architecture (SA)

WA2322 EA Practitioner's Guide (Extended)

- 44 examples of architecture artifacts & deliverables
- 8 template deliverables
- 23 industry references, providing a resource library
- 12 group discussions, applying concepts
- 15 hands-on labs

102 practical items, applying architecture
