

## WSAD V5.1.2 Installation Guide

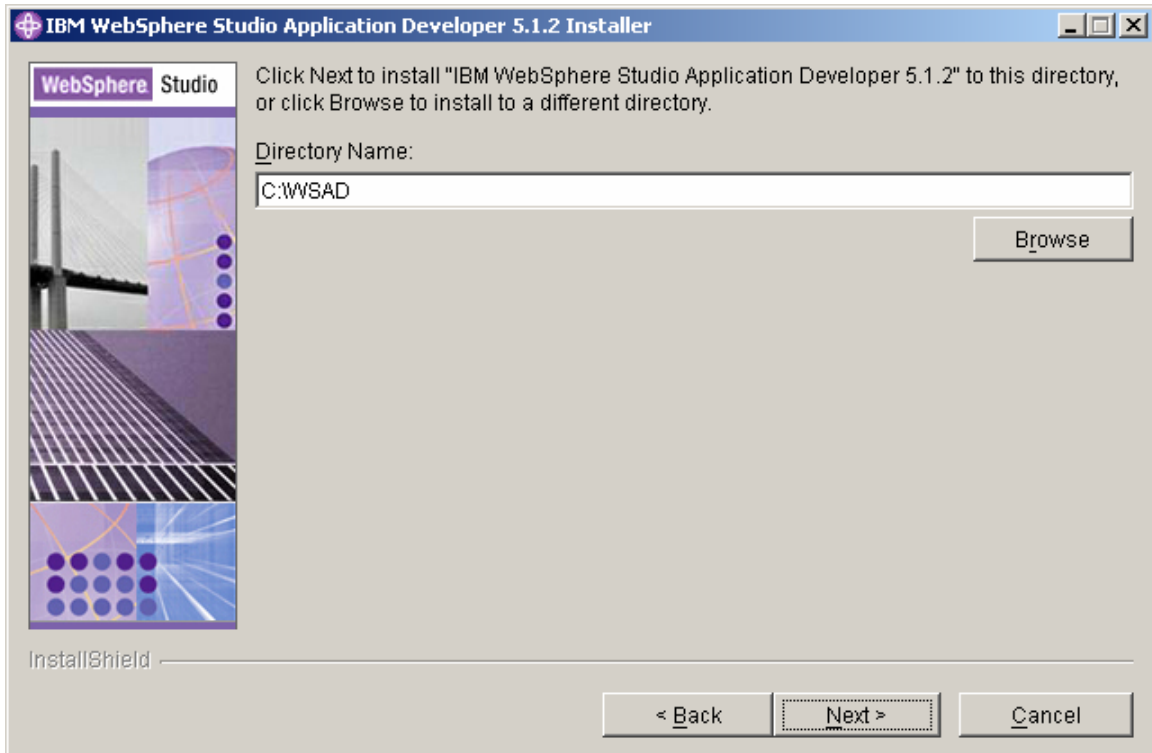

- 1.) Go into the directory C:\WSADV5.1.2\Disk1 and double click launchpad.exe. At the launchpad wizard select Install IBM WebSphere Studio Application Developer.

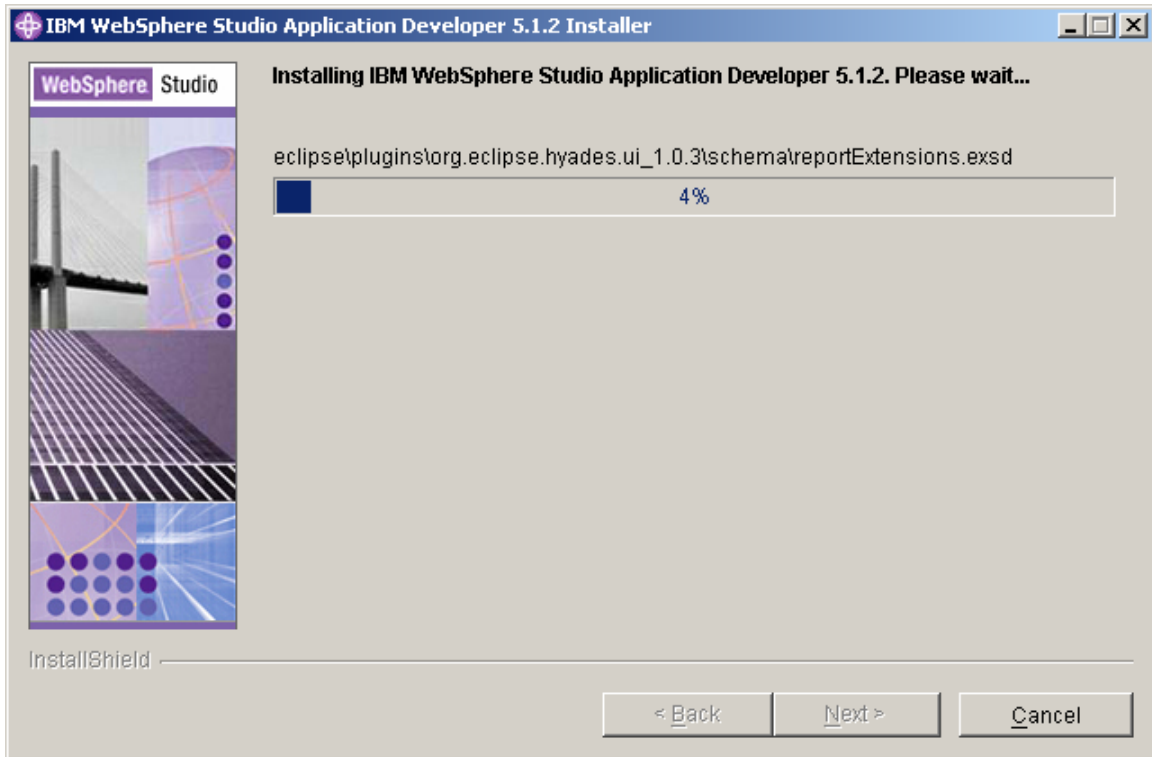

- 2.) At the welcome screen press next and then accept the license and press next.

3.) Select C:\WSAD for the installation directory and press next.

- 4.) Accept the default runtimes. Press next and next again. The installation will begin.

- 5.) Press Finish to complete installation. Exit the launchpad.
- 6.) Test if the installation completed properly by selecting Start->Programs->IBM WebSphere Studio->Application Developer V5.1.2.
- 7.) Press ok to accept the default workspace.
- 8.) Make sure you see the screen below:
