Web Age Solutions

SOA for z/OS - Set up requirements

Setup Summary:

To perform the course machine exercises, the students and the instructor each require a Windows workstation with the WebSphere Developer for zSeries V6.0.1 (WDz) client software and with internet access. Access to the WDz z/OS server software is not required.

The instructor machine should be connected to the overhead projection equipment and should have a recent version of PDF available for the presentation.

Optionally, the class can be delivered without the WDz software on the student machines - with live WDz demos performed only on the instructor machine. In this case the student machines require internet access only.

WebSphere Developer for zSeries V6.0.1 (WDz) - set up requirements:

Please see the original IBM document for possible updates at:
http://publibfp.boulder.ibm.com/epubs/pdf/c3163525.pdf

Note: Web Age Solutions can not provide the required WDz software!

Minimum workstation hardware requirements for WDz:

- Processor: Intel® Pentium® III 800 MHz or higher
- Memory: 768MB RAM is required, but 1GB RAM or higher is recommended
- Disk Space 2.5 GB minimum disk space is required. This assumes you are installing on a system with RAD or RSA v6.0 and includes space required to install maintenance updates for those products. Installation also requires 2.5 GB of temporary space for product update, installation files and other files.
- Monitor and Video Card A VGA display of 1024x768 or higher is required

Supported Operating Systems:

- Windows XP Professional with Service Pack 1 or higher
- Windows 2000 Professional or Server or Advanced Server with Service Pack 3 or higher
- Windows Server 2003 Standard or Enterprise Edition

Additional Software Requirements:

- Rational® Application Developer or Rational Software Architect V6.0
- TCP/IP Installed and configured
- Microsoft Internet Explorer V6.0

WebSphere Developer for zSeries V6.0.1 (WDz) - Installation:

Please follow the original IBM WebSphere Developer for zSeries V6.0.1 Installation Guide (SC31-6316-05)
 at: http://publibfp.boulder.ibm.com/epubs/pdf/c3163165.pdf

Follow the procedure for the installation of the WDz workstation (Client) component only. The Host components of WDz are not required for this course.

Documentation

- All students will require access to WebSphere documentation online via a reliable Internet access to the IBM web sites
