

# Data Science Priorities Mapping

My Data Scientists need to use common Data Science algorithms for machine learning

Are they working on a stand-alone computer?

Are they using Big Data in a Cluster?

**WA2715**  
Applied Data Science with Python

**WA2845**  
Practical Machine Learning with Apache Spark

My Developers and/or Data Analysts need an immersive hands-on introduction to the Python programming language and Apache PySpark (possibly transitioning from SQL to Big Data)

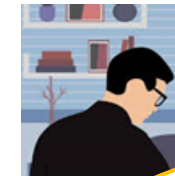

**WA2914**  
Introduction to Python and PySpark

**TP2805**  
Managing Data-Driven Projects: Building a Creative Data Science Team

I need to train data engineers to conceive, build and maintain the data infrastructure

**WA2926**  
Data Engineering Bootcamp

My business analysts need to apply Spark SQL / DataFrames to problems that lend themselves to being solved using SQL and Pivot tables

**WA2936**  
Advanced Data Analytics with PySpark
