# DevOps Learning

My team needs to understand the various key components of architecting Microservices and how to apply the knowledge to migrate applications to Microservices architected solutions on Docker, Kubernetes, and Jenkins with OpenShift. My team also wants to implement end-to-end CI/CD pipelines

WA2675
Architecting Microservices with Kubernetes, Docker, and Continuous Integration

We need training in the tools to start automating software build, test, and integration activities following Jenkins best practices

WA2944
Jenkins Pipeline Scripting

My developers need to understand the value proposition of Microservices as well as the implementation of this technology
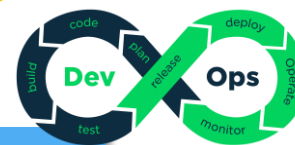

WA2874
Microservices Development Bootcamp

Our IT practitioners in management, leadership and senior staff roles require a solid understanding of the goals, practices, and desired outcomes from introducing DevOps in an organization.

WA2593
DevOps for Managers & Leaders

Our organization requires an introduction to the core DevOps concepts and principles as well as the ways to stand up the DevOps practice in an organization.

WA2451
DevOps Fundamentals

Our organization/DevOps Engineers requires an end-to-end DevOps implementation on cloud.
